## TECHNICAL SKILLS

|                       |                                                                                                                |                          |                                                                                   |
|-----------------------|----------------------------------------------------------------------------------------------------------------|--------------------------|-----------------------------------------------------------------------------------|
| <b>Engine</b>         | Unity 3D (2022 LTS / Unity 6), C#, C++, Unreal Engine 5 (learning)                                             | <b>Multiplayer</b>       | WebSockets (dual-socket, JWT auth), Photon PUN, Firebase, Netcode for GameObjects |
| <b>Monetization</b>   | Google AdMob, Unity Ads, ironSource LevelPlay, Google / Apple OAuth                                            | <b>Architecture</b>      | EventBus, Service Locator, Factory, State Machines, Object Pooling                |
| <b>XR &amp; Tools</b> | OpenXR, Oculus SDK, XR Interaction Toolkit, VR Optimization, VR Ergonomics, VR Audio, ProBuilder, DOTween, Git | <b>Mobile &amp; Perf</b> | Android & iOS builds, GPU Instancing, LOD & Batching, Performance Profiling       |

## WORK EXPERIENCE

**Unity Game Developer** Jul 2024 – Present

RENZO Technologies Pvt. Ltd. Unity · C# · WebSockets · Firebase · AdMob · Unity Ads · ironSource · Android/iOS

- Sole developer — shipped multiple production mobile games (Checkers, Ludo, Zip & Tango); one live with **2,000+ real players**.
- Architected **dual-WebSocket multiplayer** with heartbeats, auto-reconnect, JWT auth, and region-aware routing (NA / UK / India).
- Full **ad monetization** via AdMob, Unity Ads & ironSource LevelPlay; Google & Apple OAuth; stable **60 fps** on low-end devices.

**Unity Developer Intern**

Feb 2025 – Jul 2025

Caarya Unity · C# · Photon PUN · Ready Player Me · Mixamo · Cinemachine

- Integrated **Photon PUN voice-chat** for 10+ concurrent players; Ready Player Me avatars with Mixamo animations and Cinemachine.
- Shipped 2 gameplay levels and 8 rigged playable characters; maintained clean asset pipelines across disciplines.

## PROJECTS

**Online Multiplayer Checkers** Shipped · Android & iOS

Unity · C# · WebSockets · JWT Auth · Firebase · AdMob · Meta · ironSource LevelPlay · Blender

- Full checkers rules engine — 8 configurable variants (flying kings, forced capture, board sizes 8/10/12), move validation, captures, promotion and draw/resign.
- Dual-WebSocket netcode with heartbeats, exponential-backoff reconnect, and persistence across app backgrounding.
- Two-currency wallet, AdMob/Meta/LevelPlay ads; Google, Apple & Guest auth behind a pluggable abstraction.

**Zip Puzzle — Grid Path-Drawing Game**

Complete

Unity 6 · C# · URP · Input System · ScriptableObjects · Mobile

- **80 hand-authored levels** — Hamiltonian-path engine with wall-blocking, checkpoint ordering, and a drag-to-backtrack mechanic across 3×3 → 8×8+ grids.
- DFS **hint solver** with connectivity pruning and node budget — stays responsive on 8×8+ grids without blocking the main thread.
- Service Locator, EventBus, Factory, Strategy & FSM; 200+ values in one ScriptableObject for no-recompile tuning.

**VR Acrophobia Therapy**

Shipped · NIT Hamirpur Tech Fest Winner

Unity · C# · Oculus SDK · ESP32 · BLE · Pulse Sensor

- ESP32 pulse sensor streams live heart rate into Unity over **BLE**; virtual height rises only as fast as the patient stays calm.
- Comfort-paced adaptive exposure loop built for Oculus — **1st place** at NIT Hamirpur annual tech fest.

## EDUCATION & CERTIFICATIONS

**B.Tech – Engineering Physics · NIT Hamirpur**

2021 – 2025

Unity Junior Programmer Certified · Unity VR Development Certified · Python Beginner to Advanced (GeeksforGeeks) · GATE 2025 Qualified (CS)
